

Aparaa's Microsoft Consulting Services

In order to leverage their investments in Enterprise applications, organizations are constantly identifying innovative solutions to meet the changing business requirements. Aparaa works as a collaborative partner for getting the best out of your investment in Microsoft Technologies.

Application Development

Aparaa brings to table years of enterprise application development experience in Microsoft technologies.

Our experience from legacy systems to modern day n-tier, SOA and high volume applications help you in developing, integrating and managing complex applications.

As a Microsoft Partner, Aparaa has a proven track record in helping organizations manage their business requirements with increased productivity and returns. Using a robust global delivery model and a combination of onsite, offsite and offshore resources, we provide cost effective and value added solutions across various segments – Finance, Manufacturing, Distribution, Supply Chain Planning, Human Resources, Payroll, CRM and Logistics. This enables our clients to leverage the power of technology to gain critical competitive edge while maximizing the ROI.

Technology Optimization Services

Gain insight into application performance issues, bottlenecks, scalability issues and gap analysis. We study end to end application deployment and performance and give tailor made suggestions and roadmaps according to your business requirements.

Applications, middleware, services and data sources are studied and appropriate suggestions are made under this offering.

Success Stories

Aparaa helped a major energy company increase productivity by optimizing GIS database.

We provided optimization of GIS database and presentation layer. Aparaa also integrated the engineering and billing data using SOA.

Application Refactoring Services

If your application has become a complex monolith, gone through many uncontrollable iterations without proper documentation or is in an old technology which does not match the performance of current technologies, Aparaa can help you in refactoring or in migrating the application.

Aparaa has experience in reverse engineering, documentation, refactoring and migration of enterprise applications.

Aparaa helped of a major retail business build their operations reporting application.

We helped build operations reporting application using ASP.NET and AJAX technologies.
