

## Enhancing value through Aparaa's Innovative Business Solutions using Oracle Applications

In order to leverage their investments in Enterprise applications, organizations are constantly identifying innovative solutions to meet the changing business requirements. Aparaa works as a collaborative partner for getting the best out of your investment in Oracle e-Business Suite. Organizations can leverage this expertise to significantly enhance services to their trading partners and customers or streamline their finance and procurement process.

In their drive to continuously get the best out of their ERP environments, organizations are hampered by a combination of factors like:

- Increase in technical and functional enhancements to meet the changing business requirements
- Need to deploy skilled resources to perform rudimentary and repeatable tasks
- Management of multiple applications across time zones while retaining the standard of service
- Validation of the accuracy and timeliness of key business information

With Oracle's recent acquisitions of other ERP systems and specialized solutions for vertical industries, organizations now face even more complex situations related to making the right choices for their enterprise solutions.

As an Oracle Partner, Aparaa has a proven track record in helping organizations manage their business requirements with increased productivity and returns. Using a robust global delivery model and a combination of onsite, offsite and offshore resources, we provide cost effective and value added solutions across various segments – Finance, Manufacturing, Distribution, Supply Chain Planning, Human Resources, Payroll, CRM and Logistics. This enables our clients to leverage the power of technology to gain critical competitive edge while maximizing the ROI.

### Expertise

Aparaa's approach as a true partner in all our engagements spanning a range of industries like financial services, energy, manufacturing, telecommunications, logistics and transportation has helped clients plan and resolve such challenges.

Our expertise in customizing and extending Oracle Applications to suite business requirements has helped clients automate the invoice receiving and approval with the result that they are able to disburse payments faster, enhance business decision making using OLAP tools like financial Analyzer. We follow standard Oracle implementation methodologies like AIM, EMM, and Fast Forward to ensure easy monitoring of projects and on-time delivery.

## Services

Aparaa offers a comprehensive portfolio of services to Oracle Applications customers using all versions of Oracle 11, 11i and R12 products. Our services cover the entire Oracle Applications services spectrum and include implementation of advanced solutions for CRM and procurement. A summary of services is stated below.
